PROFESSIONAL SUMMARY

Results-driven Full-Stack Engineer with an architectural mindset and a proven track record of **independently designing, building, and scaling end-to-end cloud-native SaaS & E-commerce platforms**. Highly skilled across the modern **TypeScript ecosystem (Next.js, NestJS, Turborepo)** and **PHP/Laravel**. Proven expertise in **database optimization, asynchronous background processing, high-availability architecture, and CI/CD automation**. Adept at owning the entire software development lifecycle (SDLC) from concept to deployment to deliver resilient, high-performance digital products.

WORK EXPERIENCE

NOVA AI SOLUTIONS CO., LTD

Full-stack Developer Ho Chi Minh City, Vietnam | Apr 2026 – Present

Owned and delivered multiple critical business systems from scratch, functioning as the sole architect and developer.

- **B2C/B2B E-commerce & Logistics Platform:**

- Architected a scalable E-commerce backend using Laravel and MySQL, successfully handling high-volume order processing.
- Integrated **ViettelPost API**, fully automating shipping workflows, tracking statuses, and eliminating manual data entry for logistics.
- Engineered seamless and secure payment flows via **VNPay and ZaloPay** RESTful APIs, ensuring reliable transaction processing.

- **QR-Order SaaS Platform & Internal Tools:**

- Developed a multi-tenant booking system and integrated **VNPT E-Invoice (SOAP/XML)**, automating electronic tax invoice issuance for partner vendors.
- Built a geofencing-based attendance module and real-time notification engine using **Pusher WebSockets** to streamline internal workforce management.

- **Infrastructure & Security:**

- Migrated sensitive public file storage to **AWS S3 Private Storage** using pre-signed URLs and AES-encrypted payloads, ensuring strict data compliance and security.
- Managed zero-downtime production deployments on Linux VPS utilizing Nginx and Apache web servers.

QUOC BAO SOFTWARE CO., LTD

Mobile Developer Intern Ho Chi Minh City, Vietnam | Jun 2025 – Sep 2025

- Developed robust cross-platform mobile features for Android and iOS using **Flutter** and **GetX**.
- Built responsive UI components and integrated RESTful APIs, optimizing data synchronization latency and improving user experience.

SELECTED PROJECTS

UPLY – MULTI-TENANT WEBSITE & API MONITORING PLATFORM

Full-stack Developer | 2026 | [[Live Demo](#)] | [[GitHub URL](#)]

- Architected a multi-tenant SaaS platform enabling agencies to monitor HTTP service uptime and execute complex multi-step API journeys with automated incident alerting.
- Built a scalable Monorepo architecture with Turborepo, decoupling concerns into a Next.js web dashboard, a NestJS REST API, and an autonomous background worker.
- Implemented a high-throughput job queue using Redis & BullMQ to schedule recurring health checks and process assertions with sub-second latency.
- Engineered enterprise-grade security with AES-256-GCM encryption for stored API credentials, signed HttpOnly cookie sessions, and row-level multi-tenant isolation in PostgreSQL via Prisma.
- Containerized the entire infrastructure using Docker Compose and automated deployments with Caddy reverse proxy and zero-downtime bash pipelines.

STUDENT CONDUCT SCORE MANAGEMENT SYSTEM

Lead Developer (Graduation Thesis) 2025 | [[GitHub URL](#)]

- Led a team to digitize university processes by building a Web Admin dashboard and a Flutter mobile app.
- Received an outstanding defense score of **8.8/10**.

TECHNICAL SKILLS

- **Backend & Architecture:** Node.js, NestJS, PHP, Laravel, Microservices (Workers/BullMQ), Turborepo.
- **Frontend:** React, Next.js, HTML/CSS, Tailwind CSS, Blade.
- **Mobile Development:** Flutter, Dart, GetX.
- **Database & Cache:** PostgreSQL, MySQL, Redis.
- **Cloud & DevOps:** Docker, Docker Compose, Linux VPS, Nginx, Caddy, AWS S3.
- **Integrations:** VNPay, ZaloPay, ViettelPost, VNPT E-Invoice, WebSockets.
- **English:** Able to read and understand technical documentation

EDUCATION

HO CHI MINH CITY UNIVERSITY OF INDUSTRY AND TRADE — HUIT

Bachelor of Software Engineering

Oct 2022 – Jan 2026

- GPA: **3.37/4.00**
- Graduation Classification: **Very Good**
- Scientific research project selected as a finalist at the Faculty of Information Technology level.
